## Experience

### Lancaster University
**eLearning Ambassador**     Sep 2012 - Current

Responsible for providing software support to staff throughout the university. Running software training sessions for groups of 10 to 15 people.

Overseeing and testing the introduction of open learning courses and new technology such as lecture capture.

### Lancaster University
**Network Assistant**     July 2013 – Sep 2013

Duties included network testing and diagnostics of problematic data ports using industry standard tools.

Alongside this I was part of a team that removed and recycled over 7000 telephones from student accomodation bedrooms across campus, for updating to a VoIP system.

### Lancaster University
**eLearning Assistant**     May 2012 – Aug 2012

My main task was to organise and execute the migration of all university courses to a new software platform ready for the start of the next academic year.

### connoratherton.com
**Freelance Developer**     Nov 2011 - Current

Completed a number of client and open source projects ranging from JavaScript visualisation tools to custom Wordpress and OctoPress themes.

Was also a winner of the JISC Summer of Student Innovation Competition 2013. Please see my website and GitHub profile for all of the projects I've been involved with.
